ACR awarded “Best New SAP Project”

Singapore, March 1, 2009 – ACR is honoured to receive the “Best New SAP Project” for the SAP Excellence Awards 2009, an annual award organised by SAP in recognition of outstanding SAP-related projects and initiatives completed in the preceding 24 months. SAP is one of the leading global providers of business management software.

Following the incorporation of ACR in December 2006, technical tools and solutions had to be developed to meet escalating business needs. One of the challenges faced by the company was to establish a robust and fully integrated SAP solution which would provide operational efficiency in financial and accounting functions. The in-house SAP team, consisting of representatives from Finance and IT, worked closely with the SAP vendor and the project was implemented smoothly within the targeted timeframe and budget without any business disruptions.

This win is a validation of the hard work, professionalism and dedication of the ACR team. More importantly, it underscores ACR’s commitment to continually strive for improved work processes with higher efficacy levels, to better meet client expectations and business requirements.
